RIP & WORKFLOW SOFTWARE

## cmColor

RIP & Workflow Software  
Version 3.0

### Enhanced Workflow Productivity

The new web browser-based interface allows users to submit, manage and preview jobs from anywhere on the network using a MAC® or PC. cmColor stores and saves print files and configurations for future use, making repeat jobs quick, easy and consistent.

### Advanced Color Management & Spot Matching

cmColor RIP automatically identifies spot colors in an image, allowing users to easily edit, adapt and match existing color specs. During the process, users can print color swatches on material, compare, adjust the colors, save the changes per job or globally, then proceed to printing.

- Built-in ICC Profiles
- Spot Color Matching
- Web Browser-Based Interface
- Advanced Color Management
- Automatically Identifies Spot Colors

Local Dealer:

Formax **cmColor RIP & Workflow Software** combines tools for color management, spot color matching, hot folders and production job presets, with the powerful Harlequin® RIP engine to provide a seamless workflow solution. Cutting-edge features include a web browser-based interface, and ability to process PDF 2.0 file formats, and support for Windows 10. User-friendly features include Variable Data Management with the capability to merge variable PDFs with static PDFs and other graphics, built-in ICC profiles, and advanced color management and spot matching. cmColor Software is designed to be used with the ColorMax7 and ColorMax8 Digital Color Printers, and is ideal for both businesses and commercial printers. Utilizing these state-of-the-art tools, cmColor helps manage jobs and deliver professional color output, time after time.

*Built-in ICC profiles provide the highest quality output on a wide variety of papers, including standard grade envelopes, office paper, inkjet gloss and matte finish stock and inkjet envelopes.*

*Advanced color management for professional color output, time after time*

*Access cmColor directly from the ColorMax8 touchscreen, to easily edit and print jobs directly from the printer.*

cmColor Software is designed to integrate seamlessly with Formax ColorMax7 and ColorMax8 Digital Color Printers
