Local Dealer:

The **Wire100 Manual Binding System** is the ideal compact solution for binding and finishing booklets. Its modular design allows for use on its own or with the **Punch100** for a complete punch and bind system. **Setup is quick and easy with no tools required.** Operators will appreciate the **convenient integrated wire holding station.** Each pitch style (2:1 and 3:1) produces professionally bound booklets, with the **2:1 Pitch having an advantage in its versatility** to accommodate a wide range of wire bindings from 1/4" to 1 1/2" in diameter, for booklets up to 340 sheets. Wire-bound documents open a full 360 degrees, laying flat for easier reading, writing, scanning, and presentations, and the **double-loop wire binding** keeps pages secure for a polished appearance through years of use.

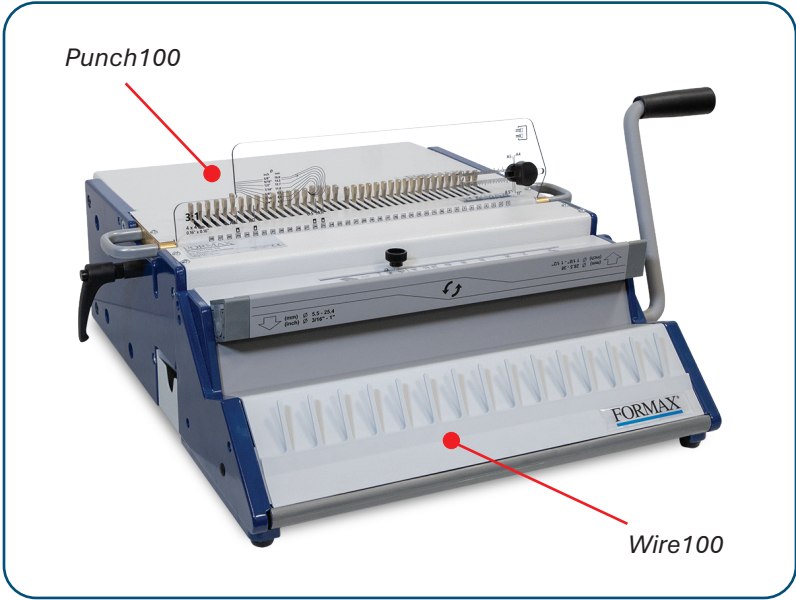

Easy-Loading Wire Holder

Convenient integrated fingers allow for easy paper loading onto wire binding.

Formax ReadyWire Binding

Packaged in patented wire sheets to keep them organized, undamaged and easy to remove.

Wire100 and Punch100 Combined System

For seamless punching and binding operation, simply attach to the front of the Punch100 using the integrated mounting pins
